

Pat Aherne's Neem Oil Fly Repellent

Flies are annoying and debilitating to cattle and can be fatal for sheep if subjected to 'Fly Strike'. Irish Dairy Farmer Pat Aherne reports excellent results using Neem Oil during the fly season

Recipe:

- 500 mls of organic Neem Oil
- 5 litres of hand hot water
- Squirt of washing up liquid.

Method:

Add 500mls of organic NEEM oil to a 5ltr spray container with the hot water (or use ratio 1:10) - add a good squirt of washing up liquid to emulsify the mix.

Pat then sprays along the backs of his cows when they are in the parlour. Repeat as needed. Pat finds once a fortnight effective.
